# Contents

Preface	<i>page</i> xiii
Acknowledgements	xv
Brief list of asteroid and meteorite terms	xvi
1 It's a small world	1
Train Station Six	1
Kepler, Bode, and the gap	5
The gap widens	8
Piazzi plugs the gap	9
Discovery of Eros and the near-Earth asteroids	15
The return of Achilles and the Trojans	19
The tutor of Achilles	21
The underworld	22
Pluto: Asteroid? Planet? Some of both?	24
El Bizarro? No, Elst–Pizarro	25
Naming	28
2 A night at the zoo	35
Sacred ground	35
The tool box	37
Cameras	40
The resolution wall	41
Measuring brightness: The magnitude scale	44
Phase angle effects	46
Glowing cinders	49
WISE mission	54
Going to class	55
Dividing the flock: C's and S's	58

	Learning the alphabet	61
	The spread	63
3	It came from outer space	67
	The ice field, Antarctica	67
	Pallas	69
	Chladni: Intuition and luck	72
	Howard finds nickel	77
	From Earth, Moon, or space?	79
	Petrographic microscope	81
	Rain of fire	83
	Eyes that see	85
	Ears that hear	88
	Murchison, Australia	91
	Life?	94
4	A day at the museum	97
	Haviland, Kansas	97
	Falls and finds	99
	Rocks: In general	100
	The meteorite family tree	102
	Parent bodies	103
	Types of chondrites	106
	Grading the class	111
	Achondrites	113
	SNCs aka snicks	119
	Pieces of the Moon	120
	Stones within stones: Breccias and xenoliths	121
	Space weathering	122
	The power of Q	123
	Making connections	126
5	The gambler's fallacy	131
	The awakening	131

---

Chelyabinsk, Russia	133
Craters, volcanoes, and the problem of big meteorites	135
Showdown at Coon Butte	138
Barringer	141
Mountains fall from the sky	143
Fractals and power laws	146
Tunguska, Russia	148
The boundary	150
Chicxulub, Mexico	154
6 Remembrance of things past	159
In the hood	159
The age of things	160
Dating by decay	162
The rules of dating	165
Patterson dates the first meteorites ... and the Earth	168
The fingerprint detection kit	170
Exposed	173
Clusters	175
A great cataclysm	178
The oldest things	179
Xenon and stellar stowaways	182
The best guess: What really happened	184
7 The ties that bind	191
False dawn	191
Ellipses and orbits	192
Professor Kirkwood's gaps	196
Secular resonance	199
Highway in the sky	200
Light versus gravity	201
Yarkovsky	204
Professor Hirayama's time machine	208

	Dust to dust	211
	The truth about Veritas	213
8	Terra incognita	219
	Arecibo Radar Observatory	219
	In the path of shadows	221
	Adaptive optics	224
	Lightcurves	226
	Shapes from lightcurves	228
	The observatories	231
	Radar love	234
	A continuous wave	236
	Radar eyes	238
	Shapes from radar	240
	Twins!	243
	YORP!	247
	A Poor Man's Mission	248
9	To your scattered bodies go	253
	A NEAR abort	253
	Galileo visits Gaspra and Ida	255
	Near Earth Asteroid Rendezvous (NEAR)	257
	NEAR sees 253 Mathilde	262
	Rosetta flies by Steins and Lutetia	263
	Deep Impact: A hit and run on Comet Tempel I	267
	The Muses Sea	269
	Dawn at Vesta	273
	Dawn departs for Ceres	277
	Future missions	279
10	Scouts, sappers, and miners	283
	Apophis	283
	Who is on watch?	284

---

How we search	288
Search magnitude limits	288
The nerve centers	291
Warning the public	292
What are the odds?	295
Damage report	297
Future searches	298
Dodging the bullet	303
Catch and release	306
A new gold rush?	308
Glossary	312
Bibliography	319
Index	341
